

Norway's 'Skifestivalen' with the DYNACORD Cobra

December 2008

ST/MKT-COM

Every year, the Norwegian town of Ski plays host to a music festival. This year the production was in the capable hands of MultiTechnic, whose team opted for a lavish sound solution based on the Cobra line-array system from DYNACORD

Ski / Straubing, December 2008 The small Norwegian town of Ski provides an idyllic setting for the so-called 'Skifestivalen', an annual open air music festival held in fall in the town centre. The festival features acts from a wide variety of genres—from rock to hillbilly, from blues to folk. This year, the technical side of the production was the responsibility of rental company MultiTechnic, ably supported by technicians and engineers from the local theatre, the Rådhussteateret, the centrepiece of whose sound reinforcement concept was an extensive Cobra system from DYNACORD (details below).

Hans Erikstad of the Rådhussteateret was in no doubt that they had made the right choice: "The Cobra delivered a transparent, clear and warm sound—but with the requisite capacity to project. It made it possible for us to provide homogeneous coverage throughout the entire square. What also pleased us no end was the unproblematic handling of the system."

About the "Skifestivalen"

The "Skifestivalen" takes its name from the small town near Oslo where the event is held. The picturesque village square is transformed for two days each year into an open-air concert hall. The festival features a wide variety of musical genres: this year, for example, high-calibre international acts such as "Powersection" and the rockabilly group "Steven Ackles and the Memphis News" took centre stage and the atmosphere was excellent.

Skifestivalen 2008 equipment list (extract):-

4 x Dynacord Cobra 4 FAR speaker cabinets
8 x Dynacord Cobra 4 Top speaker cabinets
16 x Dynacord Cobra PWH subwoofers
4 x Dynacord Cobra amp racks

The Bosch Group is a leading global supplier of technology and services. In the areas of automotive and industrial technology, consumer goods, and building technology, some 271,000 associates generated sales of 46.3 billion euros in fiscal 2007. The Bosch Group comprises Robert Bosch GmbH and its more than 300 subsidiaries and regional companies in roughly 50 countries. This worldwide development, manufacturing, and sales network is the foundation for further growth. Each year, Bosch spends more than 3 billion euros for research and development, and applies for over 3,000 patents worldwide. The company was set up in Stuttgart in 1886 by Robert Bosch (1861-1942) as "Workshop for Precision Mechanics and Electrical Engineering."

The special ownership structure of Robert Bosch GmbH guarantees the entrepreneurial freedom of the Bosch Group, making it possible for the company to plan over the long term and to undertake significant up-front investments in the safeguarding of its future. Ninety-two percent of the share capital of Robert Bosch GmbH is held by Robert Bosch Stiftung GmbH, a charitable foundation. The majority of voting rights are held by Robert Bosch Industrietreuhand KG, an industrial trust. The entrepreneurial ownership functions are carried out by the trust. The remaining shares are held by the Bosch family and by Robert Bosch GmbH.
