

DYNACORD P 64-1500 Digital Audio Matrix Manager Audio System Controller

January 2009
ST/MKT-COM

- ▶ The new P 64-1500 has a processing power of 1500 MIPS, making it the most powerful audio system controller on the market
- ▶ The 64-1500 is equally suitable for fixed installations as well as live sound

Straubing, January 2009 Dynacord presents the absolute latest in Audio System Controller technology: the P 64-1500. Its 1500 MIPS processing power sets new industry standards, and its design and special features make the P 64-1500 the premier choice for fixed installations and live sound.

Based on the already established P 64 (modular network compatible, up to 32 audio channels free configurable) the P 64-1500 Digital Audio Matrix Manager is equipped with a DSP-2 Card. The module can also provide additional DSP for the expansion of signal processing capacity as well as RAM to help accommodate long delays or additional delay lines. To enable de-centralized audio systems, multiple systems can be connected to the P 64-1500 via CobraNet. For more complex operations, the audio system controller also provides integrated control and logic possibilities. Control and supervision of the P 64-1500 run via IRIS-Net with additional benefits such as "System Check".

Features:

- modular
- network compatible
- excellent audio performance

The Bosch Group is a leading global supplier of technology and services. In the areas of automotive and industrial technology, consumer goods, and building technology, some 271,000 associates generated sales of 46.3 billion euros in fiscal 2007. The Bosch Group comprises Robert Bosch GmbH and its more than 300 subsidiaries and regional companies in roughly 50 countries. This worldwide development, manufacturing, and sales network is the foundation for further growth. Each year, Bosch spends more than 3 billion euros for research and development, and applies for over 3,000 patents worldwide. The company was set up in Stuttgart in 1886 by Robert Bosch (1861-1942) as "Workshop for Precision Mechanics and Electrical Engineering."

The special ownership structure of Robert Bosch GmbH guarantees the entrepreneurial freedom of the Bosch Group, making it possible for the company to plan over the long term and to undertake significant up-front investments in the safeguarding of its future. Ninety-two percent of the share capital of Robert Bosch GmbH is held by Robert Bosch Stiftung GmbH, a charitable foundation. The majority of voting rights are held by Robert Bosch Industrietreuhand KG, an industrial trust. The entrepreneurial ownership functions are carried out by the trust. The remaining shares are held by the Bosch family and by Robert Bosch GmbH.
