

DYNACORD PowerSub 112 A tremendous bass in a compact format

March 2010
ST/SEC-MKT

- ▶ Tremendous performance right down to the deepest regions – in a compact, lightweight format
- ▶ The integrated Class D power amplifier delivers 250 / 400 watts
- ▶ Suitable for live music, AV and fixed installation

Straubing, March 2010 The solidity of the bass foundation is often a touchy subject with a full-range cabinet. The solution? A bass extension – such as the PowerSub 112 from DYNACORD. The German specialist for amplifiers and loudspeakers has developed in the PowerSub 112 a system that, despite its mighty performance reaching right down to the deepest regions, is remarkably light and compact. The reason? The vented design – it allows the PowerSub 112 to sound very musical, tight and voluminous; in contrast to the often encountered band-pass solutions. The Class D power amplifier module delivers 400 watts and has an integrated crossover with a Mid/Hi output. In connection with the DYNACORD D 8A, the PowerSub 112 is ideally suited to the creation of compact active three-way high performance systems – whether in the live music, AV or fixed installation area.

The Bosch Group is a leading global supplier of technology and services. According to preliminary figures, some 270,000 associates generated sales of roughly 38 billion euros in the areas of automotive and industrial technology, consumer goods, and building technology in fiscal 2009. The Bosch Group comprises Robert Bosch GmbH and its more than 300 subsidiaries and regional companies in over 60 countries. If its sales and service partners are included, then Bosch is represented in roughly 150 countries. This worldwide development, manufacturing, and sales network is the foundation for further growth. Each year, Bosch spends more than 3.5 billion euros for research and development, and applies for over 3,000 patents worldwide. With all its products and services, Bosch enhances the quality of life by providing solutions which are both innovative and beneficial.

The company was set up in Stuttgart in 1886 by Robert Bosch (1861-1942) as "Workshop for Precision Mechanics and Electrical Engineering." The special ownership structure of Robert Bosch GmbH guarantees the entrepreneurial freedom of the Bosch Group, making it possible for the company to plan over the long term and to undertake significant up-front investments in the safeguarding of its future. Ninety-two percent of the share capital of Robert Bosch GmbH is held by Robert Bosch Stiftung GmbH, a charitable foundation. The majority of voting rights are held by Robert Bosch Industrietreuhand KG, an industrial trust. The entrepreneurial ownership functions are carried out by the trust. The remaining shares are held by the Bosch family and by Robert Bosch GmbH.
