

## **DYNACORD D 11A** Powered 12-inch full-range box

March 2010  
ST/SEC-MKT

- ▶ The active full-range system is conveniently equipped with a 12"/1" speaker combination and an integrated Class D power amplifier
- ▶ Suitable for live music, AV and fixed installation

**Straubing, March 2010** Boasting a 2 x 400W Class D power amplifier, an electronic crossover and loudspeaker equalization, the D 11A is suitable for a wide variety of applications including the creation in combination with powered subwoofers of active three-way high-powered systems for applications such as live music, AV and fixed installation.

For the low and high frequency ranges 2 x 200W / RMS are available. The maximum overall output comes to 800 W IHF-A.

The Line input is implemented as an XLR/jack combo socket. Via the Line Thru XLR socket, the signal can be looped directly through to additional powered cabinets. The controllable Stereo-Aux channel with RCA/cinch sockets permits e.g. the direct connection of CD or MP3 players.

In addition, an XLR microphone input with a separate level control is available. By means of the XLR Master Out socket, the mix of Line, AUX and Mic inputs can be looped through to additional powered cabinets. For operation with powered subwoofers, a switchable low-cut filter is provided.

The D 11A is equipped with the DL 12 BFH low-distortion high-powered 12" chassis for the bass and midrange. The integration of the symmetrically radiating constant directivity HF horn, with its Electro-Voice DH3 driver and nominal coverage pattern of 90° x 90°, is CAD-optimized. High sound pressure levels, a sonic image that remains free from distortion even at the edges of its bandwidth, and high intelligibility are among D 11A's outstanding audio characteristics.

*The Bosch Group is a leading global supplier of technology and services. According to preliminary figures, some 270,000 associates generated sales of roughly 38 billion euros in the areas of automotive and industrial technology, consumer goods, and building technology in fiscal 2009. The Bosch Group comprises Robert Bosch GmbH and its more than 300 subsidiaries and regional companies in over 60 countries. If its sales and service partners are included, then Bosch is represented in roughly 150 countries. This worldwide development, manufacturing, and sales network is the foundation for further growth. Each year, Bosch spends more than 3.5 billion euros for research and development, and applies for over 3,000 patents worldwide. With all its products and services, Bosch enhances the quality of life by providing solutions, which are both innovative and beneficial.*

*The company was set up in Stuttgart in 1886 by Robert Bosch (1861-1942) as "Workshop for Precision Mechanics and Electrical Engineering." The special ownership structure of Robert Bosch GmbH guarantees the entrepreneurial freedom of the Bosch Group, making it possible for the company to plan over the long term and to undertake significant up-front investments in the safeguarding of its future. Ninety-two percent of the share capital of Robert Bosch GmbH is held by Robert Bosch Stiftung GmbH, a charitable foundation. The majority of voting rights are held by Robert Bosch Industrietreuhand KG, an industrial trust. The entrepreneurial ownership functions are carried out by the trust. The remaining shares are held by the Bosch family and by Robert Bosch GmbH.*
